

Ways to Use BrainPOP at Home

BREAKFAST WITH BRAINPOP - Play a BrainPOP movie and quiz for your child during your morning routine. It is a great way to introduce a new topic, review a concept from school or explore a current event in a complete yet concise way.

DEAR TIM AND MOBY - All of our movies start with letters we received from kids or adults wanting to know more about a given topic. Have your child write a friendly letter to suggest their own BrainPOP movie topic.

SQUARE ONE - Need to research a topic or trying to decide what topic to research for a school project? Have your child search BrainPOP to get a start on their projects for safe and reliable information.

GIVE THEM A HAND - With BrainPOP, movies are just the beginning. Kids always love hands-on learning. Try a few of the BrainPOP experiments with Bob the Ex-Lab Rat, comics with Cassie and Rita, or any of our other related activities with your child and help to bring learning to life at home.

RAINY DAY? HOORAY! - Does the weather have you down? Let your child choose a fun BrainPOP movie to watch from the over 600 educational movies in the BrainPOP collection.

CONGRATULATIONS! - Use BrainPOP movies as a rewarding incentive for positive behavior or the completion of chores and homework!

TEST YOUR KNOWLEDGE - See what your child already knows and occasionally have them take the quiz before watching the movie. This will help your child to listen to content for the answers and gives them the opportunity to share their knowledge with you.

TIM'S T-SHIRTS - Does your child have a flair for fashion? Let them create their own curriculum themed t-shirts like Tim's. These can be created on construction paper or kick it up a notch and allow them to use fabric paint on inexpensive t-shirts.

THE PERFECT APPETIZER - Only a few minutes until dinner? Show a BrainPOP movie and soak up some serious learning in a short amount of time!

...OR DESSERT! - Play a BrainPOP movie at before or after dinner for the whole family! Take the quiz and try out some of the additional activities together. You might be surprised with what your child teaches you!
