
OOPS!

Some struggling readers may have thought this passage was about parents & children.

The questions that **poultrymen** face as they raise **chickens** from **incubator** to adult life are not easy to **answer**. Both **farmers** and **merchants** can become concerned when health problems such as **coccidiosis** arise any time after the **egg** stage to later life. Experts recommend that young **chicks** should have plenty of **sunshine** and nutritious food for healthy growth. **Banties** and **geese** should not share the same **barnyard** or even sleep in the same **roost**.
