

#2 Generate strong constructed responses

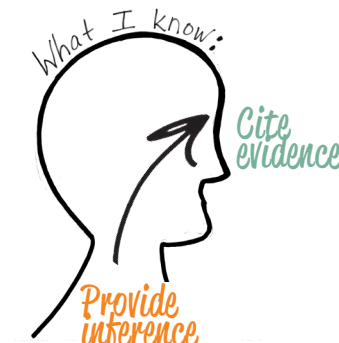

Identify the facets of a constructed response.

- | | |
|--|---------------------------|
| • Provide an inference/answer to the question or prompt. | <i>Inference • Answer</i> |
| • Support the inference with examples/details from the text. | <i>Details • Evidence</i> |
| • Explain how the evidence supports the inference. | <i>Explanation</i> |

} → **Connect the constructed response to QAR.**
 Recognize it's an inferential question that requires both *Author* and *Me* components.

Review common constructed-response formulas.

 M	A  A	M	
Repeat key words from the question/ command and provide a general answer.	Support your answer with evidence from the text.	Support your answer with <i>more</i> evidence from the text.	Explain how the evidence fits the answer/inference.
