

## **The number of kids who watch videos on YouTube is increasing**

Young Americans were asked about how they watch videos. More kids are watching videos online. They watch every day.

The number of young people who watch videos online has doubled in the last four years. They are spending twice as long watching videos than they did four years ago.

Young people mostly use YouTube. YouTube is a popular video website. Anyone can post videos. Children younger than 13 years old are not supposed to be able to use it.

“It really is the air they breathe,” said Michael Robb. He helps run the group that ran the survey. The group tracks the way young people use the Internet. It also gives advice to parents....

Eli was baking cookies. On the first tray, he baked 16 cookies. After the second tray, Eli had 37 cookies. How many cookies were on the second tray?

Lilly made 63 valentines. She gave 52 valentines to her friends at school. How many valentines does Lilly have left?
