

The Little Leprechan

Once there was a Leprechan named Lucky. He was very small. One day he went on an adventure. First he went to a farm. He was so small, the farmer couldn't even see him! Next he went to lab. He asked the scientert to make an invention that will make him bigger. So he did. It took about 3 hours to build it! Finally, it was done. He hopped in. When he came out, he was a giant! The scientert made a bigger one.

That time it took 5 hours, 80 minutes, and 90 seconds! When he was done, Lucky got in and turned smaller than ever! Lucky went away to an alligator named Snappy. Lucky said, do you have something that will make me my normal size again? No, said the alligator, but I have stilt. You can borrow them. Thank you said Lucky. When he used them, he was small, so he couldn't reach. But somehow he grew to his normal size and he walked that way.
